CONTENTS

JOURNAL OF THE JAPAN WELDING SOCIETY
Vol.73 No.8 December 2004

Essay
Miscellaneous Thoughts on the Experience of Research and Development.................................. HORII Yukihiko 3

Engineering Data Sheet .................................................................................................................. 5

Technical Information — Special Issue —
A Preface ................................................................................................................................. 6

Laser Applications in European Automotive Manufacturing: Historical Review and Recent Trends .................................................. Dirk PETRING 7
The Latest Laser Applied Technology of the Auto Industry in Europe on the Example of the Body in White Applications of the Volkswagen Golf V — KLAUS LOEFFLER 15
High Power Solid-State Lasers in the Car Body Production — From the First Applications to the Production Technology of the Future — Kurt MANN 19

Serial Lecture Paper (2)
Application of Laser Speckle Strain Measurement to Welding .................................................. MURAMATSU Yoshiki 23

Lecture for Practical Engineer
Preventive Means of Porosity on Gas Shielded Arc Welding ....................................................... MORIMOTO Tomokazu 27

Spot Light
Fundamental Study on Strength of Laser Welded Lap Joint ........................................................ KITAMURA Takanori 33

WELNET for Young Members ........................................................................................................ 37
Calendar of Event ......................................................................................................................... 39
Society Announcements ............................................................................................................... 40
General Index; Journal of the JWS and Quarterly Journal of the JWS, 2004 .................................. 43
